### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

This communication is an Examiner's reasons for allowance in response to application filed on 10/6/2003, assigned serial 10/678,090 and titled "Electronic Control Unit for Controlling Updating of Data in Non-Volatile Memory".

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The applicant's amendment filed on 11/6/2006 has been fully considered. After carefully reconsidering the application and the applied prior art, the examiner has realized the application is patentably distinct from the prior art. The prior art are not deemed strong to make the application unpatentable.

As to claims 2, 4, and 5, the prior art do not fairly suggest a control means for executing, on finding that the value of the continuous storage object data is changed in its value by N during the single operation period, a write process to write the continuous storage object data thus changed in its value by N to the non-volatile memory, and for not executing the process to write thereafter the continuous storage object data which has been changed in its value only by N to the non-volatile memory during the same operation period. This limitation in combination with the other elements in the claim was not shown or suggested by the prior art.

As to claim 16, the prior art fail to disclose a control means for executing, a write process to write the continuous storage object to the RAM until the value of the continuous storage object data is changed in its value by N during the single operation period and for executing the process to write the continuous storage object data which

Art Unit: 3663

has been changed in its value only by N and written in the RAM to the non-volatile memory during the same operation period. This limitation in combination with the other elements in the claim was not shown or suggested by the prior art.

For that reasons claims 2, 4, 5, and 16 are allowable as well as claims 3, 6, and 17-20.

The application is now set in a condition of allowance.
